

HKIE Electronics Division Activity Report

Technical Visit to Hong Kong International Airport for the RFID Facility

On 19 May 2007, the EN division organized a technical visit to Hong Kong International Airport for the RFID facility. Started off at 9.30, the visit team is greeted by, Denny Chan, of Airport Authority. Denny briefed the team about the development of the RFID baggage system. In particular, the system has been developed since 2003 and in full operation in 2005. Denny also presented the basic architecture of the system followed by a video demonstration. After the presentation, the team visited the RFID facility including the control room, RFID check points in the restricted area within the Airport. The team completed the visit by 12.15.
