Being one of the supporting organizations, a team of Committee Members of the Electronics Division crossed the border in the early morning of 19 October 2004 to attend "JEDEX Shenzhen 2004" at the Shangri-La Hotel Shenzhen. The main theme of JEDEX was "A forum for sharing expertise in semiconductor and its applications with experts coming from all over the world". The conference highlighted the latest design and market in electronic memories, as well as the latest packaging, lead-free, and process technologies. It was indeed a very important event engineers and marketers in semiconductor and PC related products.

Opening remarks were given by Mr Bi Keyun, Vice President of CISA, Ms Lin Ning, Vice Director, CESI and the Shenzhen Government representative, followed by a series of seminars and tutorials on 19 and 20 October 2004, with special emphasis on semiconductor reliability, knowledge base reliability qualification test and applications of high capacity, speed memory modules supporting higher bandwidth in digital electronics devices and appliances.
