HKIE Electronics Division Activity Report

# Technical Visit to the Hong Kong Disneyland

On 16 March 2007, members of the Electronics Division visited the Hong Kong Disneyland Theme Park. The advance technologies on wireless communication system, security system and the operation of the unique Fast Pass system in Disneyland were introduced. After learning such a lot of useful technical knowledge from the Disneyland Engineers, we were invited to enjoy a wonderful show on Lion King Festival which had deployed a lot of advance wireless control technologies.
